

► Thermo Scientific Nunc Flasks with Filter or Vent/Close Caps

cell culture treated

Nunc™ Cell Culture Flasks are Nunclon Delta treated, a proprietary cell culture surface treatment that offers maximum adhesion for a broad range of cell types.

These flasks are individually leak tested and offer growth areas from 25-175 cm². The filter caps allow constant airflow and minimize chance of contamination.

Nunc Flasks with Nunclon Delta treated surface are designed for enhanced cell attachment, growth and differentiation. Unique hydrophobic 0.22 µm filter cap utilizes a three-dimensional matrix of nonwetable polyethylene fibers that prevent penetration of microorganisms.

details

- Short, wide necks allow for easy access
- Sterilized by gamma irradiation and certified to be non-pyrogenic
- Barcoded 175 cm² flasks with large Code 128 are compatible with automation

Includes: Caps.
