

## MICRONIC | SAMPLE STORAGE | TUBES

### 0.75ML V-BOTTOM TUBE RANGE 96-WELL CONFIGURATION

DO YOU NEED MORE SPACE FOR YOUR STORAGE AND STILL BE ABLE TO USE SINGLE TUBES IN A 96-WELL CONFIGURATION? IF SO, THEN MICRONIC OFFERS YOU THE POSSIBILITY TO SAVE BETWEEN 35% AND 50% OF YOUR SPACE. WHETHER YOU CHOOSE THE 0.75ML NON-CODED RANGE OR CODED RANGE, THE 0.75ML TUBE DESIGN WILL BE IDENTICAL AND WILL CONTAIN THE SAME FEATURES.

Micronic offers a comprehensive range of non-coded, alphanumeric coded and 2D coded (Data-Matrix and TraXis) tubes. Manufactured to the industry leading strict tolerances, the precision and tube-to-tube consistency of Micronic products maximises the operational uptime when used with automated cherry picking and handling systems. The tubes are manufactured of the highest purity polypropylene, which resists many organic solvents.

The 2D codes are encrypted with a laser in the polypropylene code area, in turn guaranteeing the highest resistance to solvent attack and ensuring reliable code reading.

The 0,75ml tubes have an inner V-bottom. The gross volume of the tube is 0.75ml, with net working volume ranges from 0.50ml to 0.57ml, depending on the capping style.

The 0.75ml tubes are compatible with the Micronic Push Caps and (Low Profile) Screw Caps (TPE Caps and Screw Caps both fit Screw Cap tubes).

The 0.75ml tubes are available in bulk, refill system-96 and Lobarack-96, which features 'Twist-Lock' to prevent turning during screw (de)capping.

#### Available features

- Amber tubes for light sensitive samples
- Sterile, gamma radiated
- Snap Tubes, locks tubes into rack wells to prevent sample loss from overturned racks
- Precapped with Push Caps or (Low Profile) Screw Caps
