

## MICRONIC | SAMPLE STORAGE | RACKS

### MODULAR VERTICAL FREEZER RACK

DO YOU WANT A COST EFFECTIVE WAY TO ORGANIZE STORAGE RACKS INTO A CHEST FREEZER? IF SO, THEN MICRONIC OFFERS YOU A FLEXIBLE AND LOW COST SOLUTION. THE EASY-TO-USE MODULAR SYSTEM FITS INTO ALL STANDARD CHEST FREEZERS AND IS FULLY COMPATIBLE WITH ANSI / SLAS STANDARD STORAGE RACKS, IN TURN PROVIDING AN EFFECTIVE METHOD FOR STORING YOUR SAMPLES.

The Micronic Modular Vertical Freezer Rack provides a flexible, low cost, and lightweight solution for storing samples into a chest freezer. Simply 'click' the individual storage holders to construct a tower of up to 15 racks. The easy-to-use modular system fits into all chest freezers and is fully compatible with all ANSI / SLAS standard footprint storage racks.

Compared to storing samples in an upright freezer, a chest freezer is significantly more energy efficient due to better cold air retention. In addition to offering lower ongoing energy consumption chest freezers are typically less expensive to purchase and tend to have longer life cycles than upright freezers.

The Modular Vertical Freezer Rack is the perfect solution to get samples nicely organized in a chest freezer. Each rack holder has the capacity to house a single Micronic

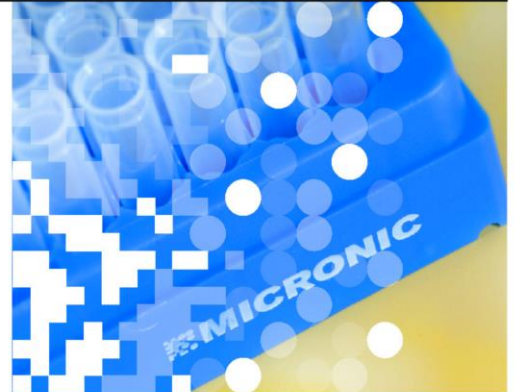

storage rack (Roborack-96, Comorack-96, Comorack-24 and Artic Rack-24). When using the Micronic Lobarack-96 with a low profile cover, one rack holder accommodates two Lobaracks, providing a space saving storage solution

For the secure tracking of your samples, all the tubes are available with a laser etched, 2D Data-Matrix or TraXis code on the bottom of the tube. The 2D coded tubes can be decoded with our 2D code readers like the Tracxer Code Reader RS210 (CRYO) and the Tracxer Code Reader TS201.
