

TUBE SELECTOR

IS IT DIFFICULT TO OBTAIN THE CORRECT SAMPLE FROM YOUR RACK? IF SO, THEN MICRONIC OFFERS YOU THE TUBE SELECTOR FOR 'HANDS-FREE' MANUAL PICKING AND PLACING OF SAMPLE TUBES FROM YOUR STORAGE RACK. COMPATIBLE WITH ALL STANDARD ANSI/SLAS FORMAT 96-RACK TUBES, THE VERSATILE TUBE SELECTOR REDUCES SAMPLE CONTAMINATION, AS CHERRY PICKING BY HAND IS NO LONGER NECESSARY.

Offering the convenience of single-handed operation, the Tube Selector is very easy to use. A single thumb button enables the rapid and secure picking of a storage tube. Pressing the thumb button again releases the tube from the Tube Selector.

The Micronic tube range provides a storage solution for the samples stored in your lab. For secure tracking of your samples, the tubes are available with a laser etched 2D code (Data-Matrix or TraXis) on the bottom of the tube. This ensures traceability when using these tubes in your lab.

Micronic tubes in a 96-well format are compatible with the Micronic TPE or Screw Caps (TPE Caps also fit Screw Cap tubes). The tubes are available in bulk, refill carrier-96, Lobarack-96 and Robarack-96.

Both racks have the 'Twist-Lock' feature to prevent turning during Screw Capping.

Micronic offers a range of low cost Starterpacks for organisations looking to implement traceable sample storage work practices. A Starterpack contains everything needed to start using alphanumeric or 2D coded sample storage tubes.

Each Starterpack contains an easy-to-use tube scanner, operating software, a case of racked tubes, (multi-piercable) tube caps, a versatile plate sealing device and manual tube decappers.
